## Experience

### Zayo Group — Application Developer Intern

June 2020 - Present

- Greatly reduced Salesforce loading time by refactoring calls to database.
- Helped internal teams save time by automating their end of quarter reports.
- Automated the process for customers to select services without the need of any human assistance.

### Med.Inventive — Software Quality Engineer Intern

May 2019 - August 2019

- Wrote code to test internal company software with external hardware.
- Created a GUI using Qt to simplify testing procedures.
- Worked with customers to provide products based on exact needs.

### Life Time Athletic — Member Services Associate

February 2017 - August 2019

- Oversaw operations of the front desk.
- Ensured a positive experience by personal outreach to members.

## Education

### University of Colorado at Boulder

Bachelor of Science - Computer Science,  
College of Engineering

August 2017 - May 2021 (expected)

Computer Science Technical GPA: 3.8

Business Minor,  
Leeds School of Business

Emphasis in Business Analytics

## Projects

### Software Development Project - Ski Base

Full stack developer of web based application designed to help skiers record days on the mountain. Managed a team of students with weekly Agile style meetings. Developed with HTML/EJS files, connecting front and back ends using NodeJS.

### Personal Website - kevinruby9.com

Personal website created to provide an online experience of resume, plus a place to host scholarly projects and assignments. Created using JS, HTML files stored in github and hosted on AWS route 53.

## Leadership

**Engineering Launch Leader** - Assisted incoming freshman to get acclimated to The College of Engineering. Helped the students through the year with any questions, struggles or advice.

**Guide Dogs for the Blind Puppy Raiser** - Raised a puppy and taught it basic manners and social skills. Bi-weekly meetings to check progress and learn new techniques.

Our Dog guided a blind person for over 10 years!

## Skills

**Programming** - Python, C++/C, Apex and SOQL through Salesforce, Qt, SQL, HTML/CSS, JavaScript, Java.

**Operating Systems** - MacOS, Linux Ubuntu via VMware, Windows

**Software Development Tools** - PostgreSQL, NodeJS, Git, Amazon Web Services, Heroku, Redux
